

HOW TO MEASURE A PILLOW TOP SHIFT

Step 1

Slide the mattress about 2 inches to one side.

Step 2

Stand the broom handle beside the mattress, one end should be on the floor and it should be held perfectly straight.

Step 3

With the broom handle placed against the side of the mattress and the ruler at a right angle to the broomstick have the other person take two pictures; one showing the entire set up and the other a close up of the measurement.

Step 4
Measure your box spring in the same
manner as listed above.

Step 5
A picture of your frame is also
required.

G

Step 6

A picture of the law tag is also required.

Step 7

Please note these measurements in question #2 of the Warranty Claim Form
